Established in 1960, it shares a common boundary with AorakiMount Cook National Park along the main divide

Aoraki/Mount Cook National Park is in the South Island of New Zealand, near the town of Twizel. Aoraki / Mount Cook, New Zealand's highest mountain, and Aoraki/Mount Cook Village lie within the park. The area was gazetted as a national park in October 1953 and consists of reserves that were established as early as 1887 to protect the area's significant vegetation and landscape.[1]. Even though most of the park is alpine terrain, it is easily accessible. The native vegetation continues to be under threat by introduced plant species ranging from non-native trees through to lupins, broom and non-native grasses. These are mostly contained in the valley floors of the Tasman and Hooker Valley, since they are the most accessible parts of the park.[12]. Aoraki/Mount Cook National Park is a rugged land of ice and rock, with 19 peaks over 3,000 metres including New Zealand's highest mountain, Aoraki/Mount Cook. Highlights. Weather forecasts, up-to-date track information and conservation merchandise, including publications and maps, are available at the DOC Visitor Centre.
