Sample Hospital Breastfeeding Policy for Newborns Many hospitals have practices that are detrimental to breastfeeding including the routine use of formula supplementation and free samples, pacifier use, and the separation of mother and infant. The AAP Section on Breastfeeding and the Section on Perinatal Pediatrics have written a sample breastfeeding hospital policy that outlines the policies and procedures that hospitals should take to support breastfeeding. [Ten Steps to Support Parents' Choice to Breastfeed Their Infant](#) Information developed by the AAP Section on Breastfeeding to help p...^Â The WHO has many breastfeeding specific resources for health professionals. If health professionals have to leave the room, interpreters have the option to excuse themselves and leave as well. However, this may cause offence or suspicion in the patient so it should be done in a polite and discreet manner.. If interpreters do stay in the room, they will take special care not to continue the conversation with the patient, or at least to limit conversation to topics not related to the consultation.^Â If possible, the interpreter should provide interpreted sample passages of the patient's exact discourse for the health professional to decide on a strategy. A patient's outburst of speech with a strong emotional content should not be interrupted by the interpreter.
