Rhetoric As A Feature of Early Civilizations Christian Myer (2006:1) says "The scholarly myth of origin has it that "rhetoric" developed in Ancient Greece." Why Meyer does not challenge what he acknowledges as myth is unclear, but this implication of the Greek provenance of rhetoric is demonstrably false. For example, orators and writers in ancient Rome depended more on stylistic flourishes, riveting stories, and compelling metaphors and less on logical reasoning than their ancient Greek counterparts. Rhetoric aims to study the capacities of writers or speakers needed to inform, persuade, or motivate particular audiences in specific situations. Aristotle defines rhetoric as "the faculty of observing in any given case the available means of persuasion" and since mastery of the art was necessary for victory in a case at law; or for The Origins of Rhetoric i has been added to your Cart.
