Lange et al. Conceptual Synth Tool using behaviour by non human primates provides foundations to generate hypotheses about the origins of human technology. Ethological studies on non-human primates in nature have revealed local behavior repertoires that are highly distinctive of different communities. Much of this cultural variation is related to problem solving mediated by the use of tools (McGrew, 1992; Whiten et al, 1999; Avital & Jablonka, 2000; Whiten & Boesch, 2001), and the acquisition of these population-specific techniques is based on socially biased learning.Â Animal Tool Behavior: The Use and Manufacture of Tools by Animals The Johns Hopkins University Press. van Lawick- Goodall, J. 1970. "A true encyclopedia of animal tool use and as such I highly recommend it for every library that serves zoologists and/or behavioral scientists as well as for major public libraries." (Andrzej Elzanowski *Acta Ornithologica*). "I highly recommend this publication to anyone who is interested in animal behavior." When Benjamin B. Beck wrote *Animal Tool Behavior* in 1980, it listed hundreds of ways animals, from insects to apes, used tools to do everything from catch prey to brush away flies. It contained all the examples Beck could find in the literature. It proved to be an inspiration to researchers, who more carefully looked for examples and documented them. Thus it was inevitable that the book would go out of date and need a revision because of its own success. Emil W. Menzel}, journal={*Animal Behaviour*}, year={1981}, volume={29}, pages={967-968} }. Tool use by animals is a phenomenon in which an animal uses any kind of tool in order to achieve a goal such as acquiring food and water, grooming, defense, recreation or construction. Originally thought to be a skill possessed only by humans, some tool use requires a sophisticated level of cognition. There is considerable discussion about the definition of what constitutes a tool and therefore which behaviours can be considered true examples of tool use. A wide range of animals, including mammals
