Bibliography in a science fair project is a list of the sources that you have referred to. For example - Name of the books you looked up to do your science project Name of the website 1you referred to Name of the text book Name of the article. share: What does bibliography mean in a science fair project mean? A bibliography is a list of what sites or books or articles you used in your project. shareÂ A sample of a science research paper will include a few things. It will have a title page, the report, bibliography, and any additional requirements the teacher may assign. share: What has the author Joyce Howland written? Joyce Howland has written: 'Science fair projects' -- subject(s): Bibliography, Science, Science fairs, Exhibitions. share The SAMPEX science team was extremely active, with 72 articles published or submitted to referred journals, 38 papers published in their entirety in Conference Proceedings, and 260 contributed papers, seminars, and miscellaneous presentations. The bibliography at the end of this report constitutes the primary description of the research activity. Science highlights are given under the major activity headings, as well as other activities of the team. One Ph.D. student, Mr. Daniel Williams, completed his thesis at California Institute of Technology based on data from the MAST instrument. Identif
