Psychiatric mental health nurses (PMHNS) practicing in the correctional system face significant challenges when providing care to incarcerated individuals who are exhibiting behavioral symptoms and those diagnosed with mental illness. Psychiatric symptoms are often viewed as feigned and treated with harsh punishment, which includes the use of solitary confinement, segregation in restrictive housing units, and physical and psychological abuse (Bard, 2018; Galanek, 2013). Ultimately, by drawing on each other's strengths, nurses and correctional officers can forge a positive working alliance to address the mental health care needs of incarcerated individuals. Therapeutic Rapport. The crux of psychiatric mental health nursing is the nurse patient relationship.
