Clear rating.Â Although no investment model works for all stocks all of the time, the dividend discount model has proven to be a reliable way of selecting stocks that on average will perform relatively well on a long-term basis. It should be among the tools that investors use to select at least some of the stocks in their portfolio. ...more. Get A Copy. Kindle Store.

We lead the Russian market in terms of expert evaluation and financing of major investment projects and sectoral and regional development programmes. In the current economic context, the Bank focuses on lean use of financial resources to support projects that promote the governmentâ€™s social and economic policy, including innovations, import substitution and infrastructure development.Â In 2014, we joined the initiative of the International Financial Corporation (IFC) on integrating corporate governance principles into investment activities, which became an important step towards making our investment policy more efficient.
