Modern risk management/risk measurement framework : Modern risk management involves the measurement and management of the risks faced by the modern financial institutions. This text offers a unique analysis of the risks faced by investors and savers through both financial institutions and financial markets, as well as strategies that can be adopted for controlling and managing these risks. The risk categories are overviewed in Chapter 20.Â Early institutions chapters: The financial services industry is approaching full circle. Originally the banking industry operated as a full service industry, performing directly or indirectly, all financial services (commercial banking, investment banking, stock investing, insurance provision, etc.).

Financial Planning and Insurance Allen, Melone, Rosenbloom, and Perspective management course is all about learning the skills and strategies of perfect management. It is knowledge about the process which enables success perspective management. The candidate should at least be a graduate from a recognised university or institution. He should be interested in the field of management. A person desiring to take up management as a career will benefit from this course. The Financial Intermediation is a two-semester course for the 4-th year ICEF students. This is an intermediate banking course for the BAc Finance and Economics programme students. The course is also included in the University of London International Programme. The course combine topics of three different subjects: Financial Economics, Theory of Financial Intermediation, and Bank Management. 3. Course Objectives. The main objective the course is to introduce modern methods of risk management in banking, to form a knowledge base for professional activities, and successful studying of financial courses in master degree programmes. As a result of studying this discipline a student should know
