Captions. Summary[edit]. Edmund Burke: Thoughts on the Cause of the Present Discontents. Author. Edmund Burke (1729–1797). Thoughts on the Cause of the Present Discontents is a political pamphlet by the Anglo-Irish politician and philosopher Edmund Burke, first published on 23 April 1770. The subject is the nepotism of King George III and the influence of the Court on the House of Commons of Great Britain. The essay was influential in defining political parties and their roles within government. In it, Burke argued that parties are "bod[ies] of men united for promoting by their joint endeavours the national interest upon He starts his investigation into the "present discontents" with a statement that might as well be spoken of things today as in the 1770s and 1780s: It is an undertaking of some degree of delicacy to examine into the cause of public disorders. If a man happens not to succeed in such an inquiry, he will be thought weak and visionary; if he touches the true grievance, there is a danger that he may come near to persons of weight and consequence, who will rather be exasperated at the discovery of their errors than thankful for the occasion of correcting them.
